

# CYLINDER

## FOOD GRADE LIQUID CO2 WITH SIPHON/DIP TUBE

**Type:** 20 Pound Cylinder    **Average Size:** 100cm H x 15cm dia    **Average Weight:** 15kg (full)

JetChill machine connects to Co2 cylinder with a dip tube (denoted by white stripe down)  
Dip tube enables machine to withdraw liquid (instead of vapour) so machine can create solid dry ice  
Cylinder can be rented or purchased from cylinder supplier  
Most suppliers will deliver/collect/refill, to/from an address and also collection/return from/to store  
Each country has choice of national and local suppliers (information available upon request)

### US Supplier Example:

Company: Airgas  
Cylinder: CD FG20AS  
Cost: \$25/Cylinder, \$25/delivery  
Contact: Brian Ansell  
Phone: 877-717-4540 ext. 11420  
Email: [brian.ansell@airgas.com](mailto:brian.ansell@airgas.com)

### USA CGA 320 Canister Connection:

1. Please ensure you read your cylinder suppliers safety data sheets before using machine
2. Liquid Co2 Cylinders are held under high pressure (50 bar in the UK) and misuse may result in injury
3. Co2 gas is an asphyxiant and may cause injury if not handled in accordance with cylinders suppliers safety data sheet, Confined Spaces Regulation and JetChill User Manual
4. Solid Co2 (dry ice) is -79 degrees Celsius and may cause freeze burns if not used correctly in accordance with JetChill User Manual
